1 North Wacker Drive
Chicago, Illinois 60606

Chicago District

Dear Mr. Wallgren:

We have studied your letter regarding Comments required for us to construct a breakwater in the Lake Poygan-Winneconne area.

We have checked with people in the area immediately surrounding the proposed sight and find that there are no water supply intakes.

As we are dealing with a very reputable firm, Courtney & Plummer, Inc., we do not anticipate any of the problems as brought forth in Items 2 - 3 and 4. They have done this type of work for a number of years and are well geared to serve the best interests of the community.

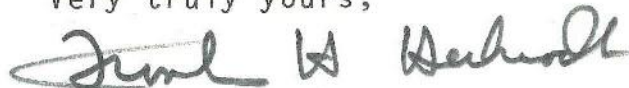

The only way this work can be done, so as not to disturb the present shore line, is to construct this breakwater during the Winter-time and transport the material over the ice. This has been our objective and, therefore, there will be no disruption of the surface of the land adjoining the property or any other type of damage to adjacent property.

We sincerely hope that this explanation to your recommendations will enable you to give clearance to this project.

We look forward to hearing from you regarding the okay of this project so that we can plan construction this Winter.

Thank you.

Very truly yours,

Frank H. Heckrodt
Secretary
